Sync2 is an all-in-one data synchronization solution that creates a mirror of your Outlook folders and contacts to another computer or cloud service of your choice. Sync2 stores your data in encrypted, secure and versatile cloud and local storage. It can be accessed with different mobile devices and browsers. Sync2 features an easy-to-use interface that allows users to decide which folders to sync, or even to customize the folders and specify syncing rules that determine which folders to sync and in what order. Sync2 can also sync your calendar, which is integrated with the cloud calendar service. It can sync your Google Tasks and have them synced to your Microsoft Outlook calendar. This synchronization software is an excellent software solution for non-technical users who need a simple way to share their personal information with other users or cloud services. Sync2 lets you share your Outlook folders, contacts, and calendars with a remote computer or cloud service. More than a tool for

synchronizing data, it can also be used for storing all the data in one place. Sync2 features easy-to-use interfaces that enable you to configure the sync settings, define sync rules, and manage your data. It is easy to use on all devices, such as a desktop computer, laptop, smart phone or tablet. With Sync2 you can set up a “slave” computer or cloud service that can synchronize with the data on the master computer. You can also synchronize your Outlook calendar to Google Calendar and Google Tasks.

What’s New: Sync2 has been updated with several new features, such as the ability to access Sync2 from mobile devices and browse through the files using Mobile Viewer. Sync2 now has an icon for downloading Google Tasks. Sync2 can create a backup of the files using a secure cloud storage or USB flash drive. Sync2 has the option to sync everything or just the selected items. New email sync rules allow Sync2 to sync only certain folders or only the recent items in those folders. Export of the sync data to CSV format has been improved to display the old and new data. Add-ins in Microsoft

Office will no longer be supported.
Main features: Sync2 is an all-in-one data synchronization solution that creates a mirror of your Outlook folders and contacts to another computer or cloud service of your

What's New In Sync2?

Integrates your personal information between different computers and ensures that no data is lost by backing up your data on a weekly basis. The software allows you to synchronize personal information such as contacts, appointments, tasks and notes. Sync 2 also allows you to synchronize between: Microsoft Outlook calendar, Contacts, Tasks and Notes. You can

sync data from multiple computers and synchronize between computers over the Internet and LAN. If you're looking for a program that will help you connect to the Internet, enable Internet Explorer to be your default browser, or provide additional customization options, you need Windows Internet Connection Sharing (ICS). If you're a Windows 2000 or Windows XP user who just can't seem to get those lousy Vista Remote Assistance or the services you're trying to run to connect over the Internet, use ICS. For a complete list of features and support requirements visit the ICS Support page. Read more about ICS and learn how to set it up and use it to access your PC from a remote location here: Written by Michael Krinke, October 29, 2009.
