Resize tool lets you zoom in on an image as large as you wish, giving you maximum control. Only when you've positioned everything precisely, can you go ahead with the crop. You must use the crop tools to get the most elements for your design. It's simply not worth designing without it. The Master Levels panel offers you quick access to the tonal comps you've made, and you'll use it to adjust your black points. And this panel also offers a ton of other features, such as the Dodge or Burn tool. It lets you apply all sorts of presets to easily change the dullness or amount of light in your image, or to correct the contrast and color.
