One, the IPTC-NWP allows for better management of the image rights. In fact, we've spoken about it before back in November of last year. In that article, we mentioned that, at that time, Adobe had released Lightroom SDK. (http://adobe.lyx.lyx.com/Lightroom/5.2.1/release/sdk/ ) This can be a great way to share your images with the public, but it will require a lot of work in order to properly implement image rights and public access. IPTC-NWP can really help with this. Applying a gradient is one of the easiest ways in Photoshop to create a more sophisticated-looking image. With live gradients in Photoshop CC, you can paint a gradient directly on your image with your fingertip, based on the direction you swipe. When you're done, you can use the Gradient tool to adjust the colors of the gradient. You'll also see the color of your gradient on the image, so you can see how it will appear when you view it in an image-viewing tool. This feature is also available in Elements 20 and is meant to give you a real-time preview of the edge or shape you're creating in your image, and also a quick way to adjust the appearance of existing edges. To use this feature, simply open an edge in Photoshop or use the Live Edges tool and then place your cursor over the edge. The tool will appear and display a preview showing the edge you're making—or the edge you already have. Photoshop offers a standard option for clipping an image so that no contents of that area are visible. For example, if you draw a photograph over a painting (clipping), only the photograph is visible. Clipping is automatic, but with other images, it's easier to see what sections are visible and what is hidden. In Photoshop and Photoshop CC, a new feature called Border Clipping lets you place an outline, or border, around an area that you want to hide. This feature includes options for Lighten, Darken, and Pencil.

Today at MAX, we're announcing a new graphics workflow around creating content progressively, and beyond, by enabling users to marry digital, computer-generated content with any form of media they wish, be it printed, on screen, or in the cloud—something that was unthinkable just a few years ago," said Shantanu Narayen, president of Adobe. "We aren't just bringing the power of Photoshop to all surfaces, images and projects; we're bringing Photoshop to people no matter what medium or surface – whether it's a mix of digital and physical, or just a pure work-from-home desktop." "We are evolving Photoshop's feature set not only to meet the needs of today's professionals, but also to embrace the ways in which they will work with images in the future," said Joanna Bolme, vice president and GM at Adobe, who adds that this means Photoshop will explore a new extension model to make features more accessible to Photoshop users. In a nod to the modern world where people increasingly are sharing for review on a routine basis, Photoshop will introduce a new Set for Review toolset that will make it easier to share images in this way. Additionally, Share for Review will help users with their professional workflow and share images directly from Photoshop. Share for Review enables users to easily create or select assets, share them for other users to comment on, and manage comments for every uploaded image in a collaborative document or gallery. Adobe has also modernized its Website editing tools in Photoshop. Photoshop.com editors can now apply changes in Photoshop without any web tools, and photos hosted in Adobe Creative Cloud, InDesign, or other Creative Cloud products can be edited without having to leave the app. Actual design and publishing workflows are best achieved in, you guessed it, Photoshop.

Shoot in raw and edit in Photoshop? The answer is yes. We live in a world where all kind of content is available for editing in almost any media. For example, we can even shoot and edit raw video in Photoshop. This opens doors for new possibilities and new styles of content. But choosing the right workflow whilst editing and processing raw footage can be daunting and stressful. **Tips on working with Raw Converted** Your busines needs and your customers need technical experiences?
