Gypsies & Travellers Map. FBL IGO 8 All Maps Mobile No cost or registration required. Maps are available worldwide for viewing and download. These include the map of Cyprus and the United Arab Emirates, but also maps of the Middle East,.1. Field of the Invention The present invention relates to an image forming apparatus for forming an image by using an electrophotographic system and so on, for example, a copying machine, a printer, a facsimile, a plotter, and the like. 2. Related Background Art As an image forming apparatus using a toner, an image forming apparatus is known in which laser light of a modulated amplitude according to image data is irradiated onto a surface of a photosensitive member to form an electrostatic latent image on a photosensitive drum, the electrostatic latent image formed on the photosensitive drum is developed by a toner contained in a developing device and, at the same time, the toner is fused on a paper conveyed to a transfer section by heat and pressure from a fusing device to form a toner image on the paper. As a method of detecting the temperature of the fusing device and so on, there are a method in which a temperature-sensitive resistor is provided in the fusing device and the resistance value is detected by a heating/cooling period of the fusing device (For example, Japanese Patent Application Laid-Open No. H05-295621) and a method in which a temperature-sensitive resistive film is formed on a heat-resistant substrate and the value of a resistance change corresponding to a change of the temperature of the fusing device is detected (For example, Japanese Patent Application Laid-Open No. H04-321062). In the method of detecting the temperature of the fusing device and so on, by using a temperature-sensitive resistive member to perform temperature detection, a temperature measuring line of the temperature-sensitive resistive member is arranged in a nip (pressing section) between the photosensitive member and the fusing device to perform temperature detection, so as to utilize a heat insulating layer formed on the heat-resistant substrate of the fusing device and the photosensitive member. Therefore, a temperature of a surface of the fusing device is detected. However, it is necessary to provide a space for arranging the temperature measuring line of the temperature-sensitive resistive member so that it is not interfered with the movement of the paper in this
